Pulsamos add:

Seleccionamos google assistant:

Seleccionamos la opción que nos interese

**Say a simple phrase**

This trigger fires when you say "Ok Google" to the Google Assistant followed by a phrase you choose. For example, say "Ok Google, I'm running late" to text a family member that you're on your way home.

Say a phrase with a number

This trigger fires when you say "Ok Google" to the Google Assistant followed by a phrase like "Set Nest thermostat to 68." **Use the # symbol to specify where you'll say the number ingredient

Say a phrase with a text ingredient

This trigger fires when you say "Ok Google" to the Google Assistant followed by a phrase like "Post a tweet saying 'New high score.'" **Use the \$ symbol to specify where you'll say the text ingredient

Say a phrase with both a number and a text ingredient

This trigger fires when you say "Ok Google" to the Google Assistant followed by a phrase like "Block time for 'exercise' at 6 PM." **Use the # symbol to specify where you'll say the number ingredient and \$ where you'll say the text ingredient

Por ejemplo la tercera, para decir:

"ok google" "guardame arduino dentro de armario de la habitacion"

Seleccionamos "Say a phrase with a text ingredient"

Ponemos \$ como la palabra que nos va a leer. Molaría que tuviera dos \$ pero solo tiene uno. La idea es decir "Guardame arduino en armario dormitorio" y que el backend sepa separar lo de antes del **en** y lo de después. Creamos el trigger

Say a phrase with a text ingredient

This trigger fires when you say "Ok Google" to the Google Assistant followed by a phrase like "Post a tweet saying 'New high score.'". **Use the \$ symbol to specify where you'll say the text ingredient

What do you want to say?

guardame \$

Enter a \$ where you'll say the text ingredient

What's another way to say it? (optional)

escondeme \$

Enter a \$ where you'll say the text ingredient

And another way? (optional)

Enter a \$ where you'll say the text ingredient

What do you want the Assistant to say in response?

Vale, te guardo \$

You can enter a \$ where you want to hear the text ingredient in the response

Language

Spanish

Create trigger

Ahora creamos el **Then That** que será la acción a realizar, un http request:

Create your own

Upgrade for more, faster, better Applets with advanced features. [Upgrade](#)

You're using 2 of 5 Applets

If

Say a phrase with a text ingredient

[Edit](#) [Delete](#)

Then That

Add

Seleccionamos Webhooks

Choose a service

Q web

Y luego Make a web request

Rellenamos los datos, OJO que la URL la llama desde internet no desde la red en la que esté conectado el "google home";

```
http://googlehome.lob99.info/inventario.php  
{ "bddd" : "{{TextField}}" }
```

Edit action fields

Make a web request

URL

**http://googlehome.lobo99.info
/inventario.php**

Surround any text with <<< and >>> to escape the content. Surround any text with <<< and >>> to escape the content. See [FAQ](#) if using an IPv6 URL.

Add ingredient

Method

POST

The method of the request e.g. GET, POST, DELETE

Content Type

application/json

Optional

Additional Headers

Each header should be on a new line formatted as Some-Header: Some-Value

Add ingredient

Body

{ "bbdd" : " **TextField " }**

Surround any text with <<< and >>> to escape the content (ex. to preserve line breaks). Learn more [here](#).

Add ingredient

Update action

Ahora ya recibimos la petición con el texto en PHP. Vamos a tratarlo.
