

<https://wiki.lineageos.org/devices/herolte/install>

Primero hay que instalar un custom recovery

Instalamos Heimdall y nos bajamos el custom recovery. El samsung S7 es herolte:

```
twrp-3.3.1-0-herolte.img.tar  
d7f03ba5bb06781328df34dc1548d8a9 recovery.img
```

Iniciamos en modo Recovery:

pulsar volumen_UP+home+power

Pulsamos WIPE / Advanced Wipe/ System,data y cache. Mmovemos Swipe to Wipe

Reiniciamos el movil y cuando esté apagado pulsamos volumen_DOWN+home+power porque sinó, carga la caché otra vez.

Nos saldrá pantalla turquesa que pone Downloading

Conectamos el cable y lanzamos el comando:

```
./heimdall flash -RECOVERY recovery.img -no-reboot
```

```
Heimdall v1.4.2
```

```

```
Initialising connection...  
Detecting device...  
Claiming interface...  
Setting up interface...
```

```
Initialising protocol...  
Protocol initialisation successful.
```

```
Beginning session...
```

```
Some devices may take up to 2 minutes to respond.  
Please be patient!
```

```
Session begun.
```

```
Downloading device's PIT file...
```

PIT file download successful.

Uploading RECOVERY

100%

RECOVERY upload successful

Ending session...

Releasing device interface...

Grabamos la imagen y los gapps en la SD.

Arrancamos y pulsamos install
